

NIKOLAS GERMISHUYSEN

Data Analyst | Data Engineer | Data Scientist

I am a teachable, enthusiastic, and adaptable data professional with an Honours degree in Statistics and a background in investment management. In my current role as a Data Associate, I have gained hands-on experience working with data pipelines, ETL processes, and data warehousing environments to prepare, transform, and deliver reliable datasets for analysis and reporting. I work with tools such as SQL, Python, and Power BI to build dashboards and data assets that translate complex data into clear, actionable insights. My strong foundation in statistical theory and machine learning enables me to approach problem-solving with rigour. I thrive in collaborative environments where data informs strategy, and I take pride in enabling others to succeed through clear communication and shared goals. Eager to deepen my technical expertise and grow within the data landscape, I am committed to continuous learning and passionate about using data to drive better decision-making.

Core Modules

- Honours Thesis: t-Distributed Stochastic Neighbour Embedding vs. Principal Component Analysis
- Multivariate Statistical Analysis
- Stochastic Modelling
- Stochastic Simulation
- Investment Management
- Financial Management
- Data Science
- Time Series Analysis
- Biostatistics

Activities & Achievements

● High-School

Deputy-Head Boy
8 IEB Distinctions
Honours Badge (An award granted for exceptional performance in four spheres over five years: Academics, Sport, Culture and Leadership)

● University

Elected Mentor
Elected House Committee Member (2 years)
Maties Ultimate Frisbee First Team (Opens)
Church Volunteer

Skills

R programming
SAS programming
Python programming
MS Azure (Fabric)
Statistica
MS Office
Data Analysis
Statistical Modelling
MS SQL
Power Bi

Education

● BCom (Honours) Statistics

Stellenbosch University
2024 - 2024
Stellenbosch Central,
Stellenbosch

● BCom Investment Management

Stellenbosch University
2021 - 2023

● Matric

Helpmekaar Kollege
2016 - 2020
Braamfontein,
Johannesburg

Experience

● Data Engineer

IT Trust

Feb 2026 - Present

- Sole developer of an automated VPS self-service platform built on Next.js and Proxmox, handling the full stack from UI to infrastructure API integration
- Engineered an async provisioning pipeline covering order ingestion, background VM creation, and automated credential delivery via Microsoft Graph API
- Wrote a Python script to extract raw operational data from the N-able MSP API and modelled it into a star schema (fact and dimension tables) in SQL Server
- Built Power BI reports connected to the on-prem SQL Server via gateway, enabling business analysis and operational dashboards from previously unstructured MSP data

● Junior Data Associate

Prophet SA, UK & US

Mar 2025 - Dec 2025

- Part of the data team delivering end-to-end data solutions across the fresh produce supply chain, spanning data engineering, analytics, and business intelligence.
- Built and maintained data pipelines and ETL processes using Python, enabling reliable data integration and improving data availability for reporting and analytics.
- Designed and developed interactive Power BI dashboards for both executives and operational teams, providing visibility into KPIs, efficiency metrics, and performance tracking.

Certifications

- SAS Programming Essentials 1
- SAS Programming Essentials 2
- SAS Programming Essentials 2

Experience (continued)

- Created employee performance dashboards, introducing a gamified approach to tracking outputs, which improved accountability and operational performance.
- Developed financial analytics solutions for key clients, including year-on-year performance comparisons to support strategic decision-making.
- Built logistics analytics dashboards to track pallet movements across couriers and freight forwarders, enabling clients to optimise provider selection based on cost, efficiency, and delivery performance.
- Delivered debtors and cash flow dashboards for exporters, improving visibility into expected inflows and enabling proactive follow-ups on outstanding payments.
- Implemented real-time operational dashboards for cold storage facilities, tracking packed, shipped, arrivals, and departures to enhance floor-level decision-making.
- Produced revenue and profitability analytics (per litre) for wine production clients, allowing detailed performance analysis across business units.
- Contributed to the design and initial development of data warehouse schemas, standardising data structures across clients to improve scalability and streamline onboarding.
- Supported the development and maintenance of a client-facing analytics portal, enabling automated internal and external reporting and significantly reducing manual reporting processes.
- Worked closely with cross-functional stakeholders and decision-makers, translating business problems into data-driven solutions and communicating insights in a clear, actionable manner.
- Utilised tools including SQL, Python, and Power BI, with a strong application of statistical analysis and data modelling techniques.

Sales Assistant

Versus Socks

Aug 2024 - Mar 2025

I formed part of the sales team at Versus Socks, responsible for interacting with customers, building relationships and selling socks in store and at expos.

Barista and Manager

Ekhaya Coffee Roasters

Oct 2024 - Mar 2025

I was a part-time barista and coffee shop manager, responsible for making great coffee and building relationships with customers. Other responsibilities include: Opening/closing the shop and interacting with suppliers.

Vice-Primarius

Eendrag Men's Residence

Aug 2023 - Oct 2024

Serving as the Vice-Primarius of Eendrag Men's Residence, I had the privilege of being Welcoming Leader to the newcomers and acted as the Head of Discipline and Safety throughout the year.

Financial Manager

Eendrag Men's Residence

Aug 2022 - Aug 2023

I had the responsibility of driving strategic decision making, setting up budgets, communicating to stakeholders and managing the CARE-Fund (an in-house fund for less privileged students).

Student Mentor

Eendrag Men's Residence

Jan 2022 - Dec 2022

I formed part of the mentor group at Eendrag Men's Residence, who helped ensure a smooth transition for all first year students from school to university, both emotionally and academically.
